It also features over 200 different toys, such as balls, catnip-filled toys, and drinking bowls for the cats. Plot In this version of the game, the player takes on the role of a small rodent named Ziggy. The game begins with the player in the forest, waiting for their owner, a puppy dog named Puff, to return from a walk. In the game, the main gameplay features occur when the player clicks on an area of the screen to play a mini-game, which could be for "luring" a cat, or collecting toys, or being rescued by a puppy. "Luring" involves the player having to use a carrot on a stick to lure a cat out of hiding. This could be used as a way to pet the cat. The idea behind this mini-game is that the player is able to collect toys for their puppy Puff, or to get them back if they have been stolen. When Puff gets older and is able to walk around on his own, the game adds new gameplay features. During this time, the player may go on journeys with Puff and travel to different places. There are many places the player can go in this game, including a cave, a lake, a rock waterfall, a library, a shopping mall, a farm, a swamp, a cave, a graveyard, a supermarket, and a park. "Journeys" consist of the player traveling to and from a specific place to do a specific task, such as getting catnip, buying a toy, or being rescued. Once the player reaches a destination, the dog and cat from the mini-game can join them. "Journeys" can also be customized with a "history" or "story", which allows the player to write down notes. There are also several different pets that the player can own, such as a cat, a dog, a fox, a womrat, and a bird. There are also many different toys, such as balls, catnip-filled toys, and drinking bowls for the cats. The game also features over 200 different toys, such as balls, catnip-filled toys, and drinking bowls for the cats. The dog can also play fetch. After the player owns a pet and has a large amount of toys, the game's final gameplay features of this version are unlocked. These features are described as "master" features, as they are unlocked by the player after they've played the game 82157476af
